## natural wood floors

stable · natural · healthy

Stability in a wide variety of climatic zones and areas of application means long-term product quality and flexibility. Therefore, we produce our planks in a symmetrical 3-layer construction using the same wood for top and back layers.

Man and wood harmonize and should not be separated. mafi promotes direct, genuine contact with wood and thus finishes floorboards with natural, air-dried oils.

Our wooden floors combine a pollutant-free product with a health-promoting effect. The unique, breathable surface improves your indoor climate in a sustainable manner.

## GENERAL INFORMATION

With this price list, all previous editions are invalid. Error, price and technical changes reserved. For any questions, we are happy to help you.

Variations in colour and structure are natural characteristics of wood. Wood structure, colour and any proportion of sapwood vary constantly due to the availability of raw material. For further information, please contact our team. Printing-related colour differences in the price list are, in principle, not excluded and represent no reason for complaints compared to the real wood floor.

mafi sorts according to the "free class" standard, EN13489 Appendix B. For special characteristics of the sorts of individual products, please refer to the corresponding product descriptions. Unless separately noted, the product description applies to both planks and wide-planks of the same product.

For technical specifications such as underfloor heating suitability, application areas, emission classes, fire behaviour, etc. please refer to the footer of the respective price list for each relevant product. You will also find detailed information in the product data sheets at [mafi.com](https://www.mafi.com).

## RETURNS AND SURPLUS DELIVERIES

Due to the customised flexible ordering options, no planks or packages may be returned. A mafi natural wood floor is designed specifically for you or your customers according to your order specifications with a lot of handcraft. Due to variable dimensions, it is unfortunately not always possible to produce your orders to the exact amount. Therefore, there may be up to a maximum of 3% surplus material delivered or invoiced.

## MAFI PASSPORT

For all products according to the price list a mafi passport for end customers is handed over along with your delivery note. This passport includes a registration code for the authentication of the mafi natural wood floor as well as care instructions. On the back case of this passport there is a delivery confirmation, with which you can confirm the handing over of these care instructions.

Each customer must receive mafi care instructions, which are already enclosed with the offer.

## SHIPPING INFORMATION

Please note the following checklist for direct deliveries:

- Approach possible for semitrailer? (Note access roads)
- Stacker or staff available for unloading?
- Local contact person and cell number available?

In case of non-compliance, we reserve the right to charge any additional costs. Outside of Austria and Germany, ground sales are usually FCA Schneegattern, Austria.

## PACKAGING, TRANSPORT AND SURCHARGES

mafi natural wood floors are attached to piles of wood per standard as packages wrapped in foil and delivered with plastic tape. Due to our order-related production, the period between the end of production and pick-up is to be kept as short as possible. Transport costs are charged separately. Prices are not discountable.

### Deliveries

Minimum order:	25 m <sup>2</sup>
Shortfall minimum order:	50.- EUR processing fee

### Packaging

On pile of wood or pallet with edge protection:	0.50 EUR per m <sup>2</sup> of floor
IPPC box:	2.00 EUR per m <sup>2</sup> of floor
Express shipping (bubble wrap and/or sandwich panels):	30.- EUR per package
Special packaging:	on request

### Storage Fees

1 week past the end of production:	free
Beyond that:	70.- EUR per pallet started per week

### Export

Export papers (certificate of origin, export accompanying documents, etc.):	150.- EUR
Phytosanitary Certificate:	200.- EUR
Country-specific inspections:	on request

## ORDERING SYSTEM

We have brought the delivery times to the point. No other floor manufacturer can deliver your custom-made floor faster! In the price list you will find our products marked with the following points:

-  GREEN: Your personal mafi natural wood floor is from the 4th working day on its way to you!
-  YELLOW: Your personal mafi natural wood floor is from the 10th working day on its way to you!
-  RED: Sampling and delivery time on request, depending on the raw materials.  
Attention: order quantity of  $\geq 300$  m<sup>2</sup> per product = RED DOT!

### mafi.com online ordering

#### Price calculated from / margin calculator / available 24 hrs.

As an alternative to a written order, the mafi.com online ordering system is available for our partners. The shopping cart-based system automatically calculates any surcharges and provides information on the appropriate point system to calculate the delivery time. Requests can be converted in just a few seconds to offers or orders. Thanks to the structured data collection, all parties save time and reduce possible sources of error.

We are happy to inform you: [office@mafi.com](mailto:office@mafi.com)

## ARTICLE CODE SYSTEM

The mafi article code system is flexible and depends on the options you choose. This code consists of the product, the surface treatment and the dimensions.

### Product

The first four digits identify the product: e.g. ECEB

### Surface

The next three digits identify the respective surface: e.g. BKN

Only certain surfaces are available per product. Further information is available on the corresponding product price list sheet. Special surfaces are available upon request. Not all combinations are technically feasible or sensible.

### Dimensions

The third part of the article code defines the dimensions of length, width and thickness. Variable dimensions are specified with 0. So, from the variable lengths 1800/2000/2400 the article code will be 0000. If a fixed length is set, 2400 will be used for example.

NEW: The spelling of variable dimensions also provides information if a selection is possible, and whether or not it is connected to a surcharge:

= Selection possible without surcharge E.G.: Thickness: 16 19 mm	/ = Selection possible with surcharge Length: 1800/2000/2400 mm	- = no selection possible, completely open Width: 120 - 220 mm
---	--	---

### Skirting

With mafi skirting boards and stair noses, the corresponding profile must also be selected in addition to the desired dimensions.

### Stairs and Parquet panel

Differing stair solutions are offered matching to the floor. In this price list you will find designated prices for Oak Clear, Oak Character, Oak Country and Oak Vulcano. Stairs for other mafi natural wood floors are available on request. For ordering stairs, the corresponding profile must be selected, as well as completely filling out the mafi stairs form (download option on mafi.com). The pattern for boarded parquet flooring is likewise selected via a profile selection from A to D.

### Symmetrical 3-layer construction

With symmetrical 3-layer construction both the top and back layers consist of the same type of wood. The top layer is, depending on the type of wood, approximately 4-5 mm (approx. 4 mm hardwood, approximately 5 mm for coniferous wood). The cross-lyed soft wood middle layer provides excellent shape stability - ideal for installation on underfloor heating. mafi uses only formaldehyde-free white glue. This is made from water, coal, chalk and acetic acid, and without solvents which could cause allergic reactions. White glue health hazards are not known. mafi uses no formaldehyde-containing substances. Therefore, our floor can be classified in the E1 classification (ÖNORM EN 14342). Each plank is fitted with tongue and groove for endless installation.

### Symmetrical 3-Layer Structure (Parquet panel)

Symmetrical 3-layer construction with a circumferential bevel as well as a tongue and groove on all sides for endless laying. Top layer, approx. 4 mm (hardwood), consisting of quality select wood. Middle layer consisting of a 3-layer panel; white glue (PVAc) is used to stick it to the top and back layers. Back layer, approx. 4 mm (hardwood), consisting of the same wood as the top layer.

### Multi-layer construction (thin-plank)

The top and also the back layers are made from the same wood with the same thermo treatment. The top layer measures approximately 3 mm while the back layer is approx. 1.8 mm thick. For the middle layer, softwood elements positioned at 90° are used. The thin plank has a total thickness of 10mm and is ideal for installations with low structure heights, as often found in renovations.

### Compact multi-layer construction (Piccolino)

Compact multi-layer construction with all-round tongue and groove for endless installation. Top layer approx. 4 mm or 5 mm (hardwood or softwood) consisting of selected quality wood. Middle layer of cross-glued soft wood, back layer of softwood, gluing of running layer and back layer with white glue (PVAc).

### Domino Vulcano Elements

Domino floors combine the advantages of the mafi Vulcano collection with modern design possibilities. Many parts produce a whole worth seeing that is inspiring thanks to vitality and style. Domino Vulcano elements are end-grain and cut across the trunk. The cubes (40 x 40 mm) are held together on a floor net and by gluing on a standardised underfloor result in a particularly hard-wearing floor suitable for the commercial interiors. Important: The installation may only be carried out exclusively by professionals. The mafi installation instructions must be adhered to.

Top

Bottom with floor net

## AREAS OF APPLICATION

All mafi natural wood floors comply with the CE guidelines according to ÖNORM EN 14 342. For information on the areas of application and suitability for underfloor heating of the individual products, please refer to the respective price list sheet. **ATTENTION:** Only with specific expert consultation and after examination of the area of application!

**P1:** Suitable for low to medium stress areas: bedrooms, children's rooms, and living rooms etc.

**P2:** Suitable for medium to heavy duty: kitchen, dining room, etc.

**O:** Suitable for commercial areas

**Suitable for underfloor heating:** Pre-requisite: compliance with the installation and maintenance instructions!

## APPLICATIONS

### Flex

mafi FLEX is available as an optional application for many of our products. The planks are already oiled once in the factory and prepared for bending. The precise processing makes the planks flexible up to a maximum radius of 40-60cm (which can vary depending on the type of wood and the type of installation).

**INSTALLATION:** The curved boards can be glued onto the carrier material or screwed/nailed using the tongue and groove. The carrier material is already in the desired radius. In order to make the bending of the planks easier, the wood must always be washed during installation with warm soapy water. This allows the wood to flex and the wood fibres become smoother. For the suitable mafi FLEX products and the relevant surcharges, please refer to the individual price list sheets.

### Herringbone & Chevron

In the basic collection, you will find a selection of classic oak floors in a symmetrical 3-layer structure, prepared for herringbone or Chevron installation. The floors of the Piccolino collection can be ordered also as a 90° herringbone. There is a surcharge for the extra milling required.

Herringbone

Chevron

### **Lye treated surfaces**

For surfaces with lye treatments, large colour differences can arise between the individual planks. These harmonise over time and with regular care with mafi wood floor soap.

### **Vulcano Floors**

The noble, brown colouring of the Vulcano is achieved by a special thermo treatment (high-temperature wood drying process) without any chemical additives, only with heat and water. Swelling and shrinkage as well as internal stresses are reduced, and this increases the resistance to fungus and pests. In addition, the dimensional stability also increases. As the floor remains so perfectly natural, it is also necessary to protect it from strong UV rays to prevent lightening. Colour differences remain in the wood despite the thermo treatment and become more intense due to the dark tones.

### **Metal on Wood**

Especially with Oak floors, the tannic acid in the wood can react with metal and cause black spots (oxidation). To counteract this effect and also reduce scratches, we recommend using felt pads under tables, chair legs, etc. Use white or beige felt pads as coloured felts rub off. Also, flower pots should not be placed directly on the floor, as moisture between the wood and pot cannot dry out and this leads to the formation of mould. Oxidation stains can usually be removed with mafi wood lightener.

### **Domino**

The mafi Domino collection is not pre-oiled during production, but must be oiled after installation on-site. Thus, mafi Domino floors can only be ordered raw. The final look can then be achieved with the corresponding mafi wood floor oils. Please note the mafi installation instructions.

### **Packaging**

mafi natural wood floors are packed in packages with multiple planks. Packages with floors of 16 mm thickness contain six planks; of 19 mm and 21 mm thickness contain four planks. Thin planks and floors of the Piccolino collection are packed with nine planks per package. Domino floors with a thickness of 9 mm contain 20 pieces and with a thickness of 19 mm contain 10 pieces per package.

### **Glue**

The solid wood layers of mafi natural wood floors are bonded only with PVAc (white glue). This is made from water, coal, chalk and acetic acid, and without solvents which could cause allergic reactions. mafi uses no formaldehyde-containing substances. Therefore, our floors can be classified in the E1 classification (ÖNORM EN 14342).

## DIMENSION OVERVIEW

The lengths, widths, and thicknesses offered vary from product to product. Possible variants can be inferred from the corresponding product detail page.

Can't find the right thing? Just inquire at [office@mafi.com](mailto:office@mafi.com). We are a manufactory; we can do just about anything.

### Lengths

A lot of products are offered with accruing lengths. This stems primarily from our central idea of sustainability and the approach anchored in it to make the best possible use of the entire tree. Even visually, the mixed lengths provide an authentic design for cottage floorboards, especially when the floorboards are laid in a wild lattice. Fixed dimensions are generally possible for an additional charge.

Please also note our room-length floorboards of four or five meters in length.

### Widths

Thanks to the symmetrical 3-layer structure, which guarantees stability, we offer a lot of products in widths up to 30 cm. The product range likewise includes timeless, elegant, and, above all, narrow floorboards of just 10 cm.

The installation of mixed widths, which really prove effective particularly in our wide floorboards, is increasingly popular.

### Thickness

We offer our natural wood floors in different thicknesses to provide our customers with maximum flexibility. The standard thicknesses of the hardwoods are 16 or 19 mm, and those of the softwoods are 16 or 21 mm. To achieve them, the thickness of the middle layer is changed, while the top and back layer thickness remains unchanged.

Exciting features for renovation and modernization work include our thin floorboard and Piccolino collection with a low structure height of just 10 mm.

## CUSTOM COLOR — GIVE YOUR NATURAL WOOD FLOOR A PERSONAL TOUCH

### Broad Color Spectrum

Depending on the product, knots and, if available, cracks are puttied in color and thus sealed. Here, we choose two contrary approaches according to the design. Either an attempt is made to integrate the knot/crack into the overall appearance of the floorboard as naturally and harmoniously as possible, or an attempt is made to highlight it in a sharply contrasting color choice.

This color choice is up to you as well and can be individually selected as part of our CC products. All we need for this is the RAL code of the desired color. We will also be glad to attempt approximations to color samples that you or your customers provide.

**CHANGE:** The former standard colors white, silver, and sand are still available as part of the CC colors described above.

## INSTALLATION AND CARE

Only mafi products may be used for the handling, cleaning and care of mafi natural wood floors. Any warranty claim is void in case of the use of third-party products, in addition no complaints will be considered. Please refer to our installation and maintenance instructions as well as the information in the mafi passport.

### Installation

Audit requirement: Prior to installation, the underfloor must be checked for its standard compliance!

mafi natural wood floors can basically be floating or glued partially or fully. The choice of the correct installation method can depend on local conditions.

The planks are oiled already once during production. Following installation, the entire surface must be re-treated again. Thus, a perfect surface can be handed over to our customers after the elaborate construction/reconstruction phase. With 1l of mafi wood floor oil an area of 60 - 90 m<sup>2</sup> can be re-oiled, depending on the absorbency of the wood.

The floor, room or product temperature should be 18 - 25° C. It is also necessary for sufficient airing to ensure the oil cures (oxidative drying) with oxygen. The floor must be vacuumed and free of fine dust before the oil application.

mafi wood floor oil is applied directly on the floor and polished immediately into the wood with a white pad. Edge areas should be oiled by hand. Please ensure that this is performed in the direction of the planks. Finally, the entire surface is polished with a sheep wool pad. No oil traces should remain on the surface as these will become sticky.

CAUTION! Safety Rules: Oil soaked cloths, fleeces, sheep's wool pads etc. must be immediately soaked in water and dried in the open air! Otherwise there is a danger of spontaneous combustion!

### The first steps after installation

- 1 · Re-oiling on site: The floor has to be slightly re-oiled and polished after installation by professionals, in order to ensure an optimal surface.
- 2 · Allow the Wood Floor Oil to soak in: After 24 hours, the floor can again be walked upon carefully.
- 3 · Oil penetration of the plank: During the first 14 days no liquids should come into contact with the floor.
- 4 · Care buildup: Over a period of three weeks, the floor should be wiped once a week with warm water and mafi Wood Floor Soap.
- 5 · Regular Care: In an average private home, it is enough to wipe the floor once a month with warm water and mafi Wood Floor Soap – otherwise just vacuum.

### We recommend using mafi maintenance oil balm instead of mafi wood floor oil to subsequently treat the following floors:

- Grey oiled floors (BKA, BKG)
- Customer-specific/custom surfaces
- deep white natured surfaces

### FINISHING

After laying, apply the mafi maintenance oil balm along the length of the floorboards using a surface wiper. Here, it makes sense to work on small areas. Yield per liter: approx. 20 m<sup>2</sup> (depending on the absorbency of the wood).

Let the balm absorb: The floor will be dry in approx. 1-2 hours.

Polishing the entire surface: Polish the floor with a monodisc machine and white polishing fleece.

If required, the balm may be reapplied once after drying.

### Care

Every mafi floor is unique and changes with the people who live on it. For long term value preservation, we recommend complying with six care steps. This applies: cleaning and care in one!

#### Basic equipment

- Two buckets
- A cotton wool cleaning mop
- A mafi wood floor soap container

#### Cleaning and care in one

- 1 · Fill both buckets with warm water.
- 2 · Add the suitable mafi wood floor soap into one of the two buckets (125 ml soap and 5 l of water). This two bucket principle ensures the clean soapy water does not get mixed with the dirty water.
- 3 · Starting at the edge of the room, wipe the soapy water mixture in the direction of the door/exit using a cotton cloth mop (mafi Vulcano floors should only be lightly wiped).
- 4 · After a short soak time, the surplus water should be wiped off with the cotton cloth mop and wrung out into the second bucket. The mafi wood floor soap dissolves the dirt from the pores and the contaminations are then removed from the wood with the second wipe of the mop.
- 5 · Thereafter, the cotton cloth mop is washed out with clean water in the second bucket.
- 6 · Repeat steps 3 – 5 for the remaining floor area.

#### TECHNICAL DATA

- Lindane and Pentachlorophenol: < 5 ppm
- Fire certification: CFL-s1
- Emission Category: E1
- Anti slip rate on brushed Oak: R11

# Tiger OAK

Oak wood with consistent colouring resulting from special heat treatment (without chemical additives). Oak plank in 3-layer construction with small bevel on long side and approx. 3,5 mm top layer, with approx. 4 mm backing in the samewood and middle layer conifer. Tongue and groove on all sides for easy installation. Small open cracks and unsealed spots of a few millimetres are permitted. Knots up to 25 mm diameter and cotter possible.

An extravagant and, at the same time, hard-wearing natural wood floor with the particular attraction of intense shades of colour in the wood! EVERY FLOOR IS UNIQUE!

Recommended Price, excl. VAT / GST

# OAK Character Thin-Plank [EIDD]

Oak plank in multilayer structure with small bevel on long side and approx. 3 mm top layer, with approx. 1,8 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. For the main part the planks have healthy knots. Stress cracks up to 30 cm, also torn knots and small knots are sealed with appropriate wood putty. Repairs up to 25 mm diameter are possible.

Very robust floor planks, suitable for commercial use.

Recommended Price, excl. VAT / GST

## OAK Sand [ECE5]

Oak plank in 3-layer construction with small bevel on long side and approx. 4 mm top layer as well as approx. 4 mm backing in the same wood. Conifer middle layer. Tongue and groove on all sides for easy installation. Planks with healthy knots are part of the appearance as are cracks, knots und knotholes that are accentuated by sand-coloured putty. Deviations in colour and isolated sapwood at the edges is possible. Small open cracks and unsealed spots of a few millimetres are allowed.

The rather lively character harmonizes with the sand-coloured putty. This floor is suitable for heavy traffic good for commercial purposes.

## OAK Country Vulcano Medium [EKVU]

Oak wood with consistent colouring resulting from special heat treatment (without chemical additives). This treatment is intensifying the natural color play of the wood and leads to a variation in brown tones. Oak plank in 3-layer construction with small bevel on long side and approx. 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. Cracks, knotholes and large knots are emphasized with black putty. Variations in colour and sapwood at the edges possible. Small open cracks and unsealed spots of a few millimetres are permitted.

Intense color play between light-brown and brow. Floor with very vivid character! Very robust floor planks, suitable for commercial use.

## LARCH Vulcano [LAVU]

Larch wood with consistent colouring resulting from special heat treatment (without chemical additives). Larch plank in 3-layer construction with small bevel on long side and approx. 5 mm top layer, with approx. 5 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. Knots up to 50 mm diameter and splay knots (30 x 60 mm) are possible, also max. 2 false knots per metre of plank length. Max. 4 pitch pockets per plank are permitted, also cracks up to 50 cm. Some sapwood is possible.

The beautiful shades of colour and the varying structures result in the unique antique character of this floor.

## FIR Wide-Plank [TABD]

Fir plank in 3-layer construction with small bevel on long side and approx. 5 mm top layer, with approx. 5 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. This particularly robust raw material originates from native mountain forests (Austria), from trees felled in the winter months. Typical are bony, well-embedded knots up to 60 mm diameter and pronounced formation of the annual rings. Isolated knotholes up to 30 mm diameter are sealed with appropriate wood putty. Stress cracks up to 50 cm are possible. This floor is ideal for rustic-style rooms and also for contemporary architecture.

## Swiss Stone Pine [ZIEB]

Swiss Pine plank (pine wood from mountain regions) in 3-layer construction with small bevel on long side and approx. 5 mm top layer, with approx. 5 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. Typical surface with large knots up to 100 mm diameter and sapwood (around 1/3 of the plank). Isolated sealed cracks up to max. 1/3 of plank length are possible; stress cracks in the knots and small cracks of up to max. 25 mm diameter are also closed with appropriate wood putty.

This floor is appreciated particularly by connoisseurs and lovers of Swiss Pine for its fragrance. Scientific studies have proved its positive effect on sleep behaviour. (Source: Institut für Nichtinvasive Diagnostik, Austria) The floor is therefore highly recommended for installation in bedrooms and relaxation rooms. A further advantage of Swiss Pine is its function as natural protection against moths!

Recommended Price, excl. VAT / GST

Article Number	Dimension in mm (l x w x t)	EUR / m <sup>2</sup>

## BEECH Vulcano Fresco

Beech wood with consistent colour resulting from heat treatment (without chemical additives). Beech plank in 3-layer construction, bevelled (2.5 mm) on the long side and with approx. 2,5 - 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation.

Arco have a strong and raised structure. Especially when barefoot the feel is of a fine experience for our stressed-out feet in the hectic everyday life. In addition, the special surface makes the floor extremely robust, as the softer parts of the wood have been removed. Therefore the Arco surface is suitable for heavy usage such as in the catering or hospitality industries.

## Carving Grunge I [C001]

Oak plank (1/2 OAK Country Vulcano, 1/2 OAK Country) in 3-layer construction, bevelled on the long side and with approx. 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. Cracks, branch knots and splay knots are highlighted with black putty. Colour variations and some sapwood are possible. Small open cracks and unsealed spots in the millimetre range are allowed. The graphic design is laid out across approx. 15 m<sup>2</sup>. In order to get the most natural image, it should be taken into consideration that any repeat planks should not be laid out close to each other.

Carving is an extraordinary symbiosis between the natural structure of wood and a variety on graphic design. The innovative Carving technology enables us to engrave classic, retro-modern and contemporary designs into naturally oiled wood surfaces. What used to be the rough sound of the Seattle music scene, today forms the unconventional design that is Carving Grunge I.

Individuality and independence are the values that this design embodies. The striking surface structure draws attention to itself and thanks mainly to the individual design possibilities, makes it ideally suited for implementation in corporate architecture.

## Carving Club I [C503]

Carving Club I is based on a robust Beech wood with consistent colour resulting from heat treatment (without chemical additives). Beech plank in 3-layer construction, bevelled (2.5 mm) on the long side and with approx. 2 - 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Scattered knots may occur. Tongue and groove on all sides for easy installation. The graphic design runs along the plank and is repeated several times lengthwise. In order to avoid joins in the same position, there are indicators where to cut and these are marked with „CUT“ along the groove.

Carving is an extraordinary symbiosis between the natural structure of wood and a variety on graphic design. The innovative Carving technology enables us to engrave classic, retro modern and contemporary designs into naturally oiled wood surfaces. Directness, clarity and structure - Carving Club I projects these values with its honest yet sophisticated design. Its subtle charm ensures a highly recognisable value, but without intruding. Through its striking design Carving Club I is especially suited for boutiques and showrooms. It is also ideal for health & spa areas due to its non-slip surface.

## OAK Clear Carving Chevron I [C019]

Oak plank in 3-layer construction with small bevel on long side and approx. 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. The planks are free from knots and sapwood but have some curled spots. Small knots and slight stress are cracks possible.

Carving, an extraordinary symbiosis between the natural structure of wood and a variety on graphic design. The innovative Carving technology enables us to engrave classic, retro-modern and contemporary designs into naturally oiled wood surfaces. Inspired by the French herringbone look, the Carving Chevron I was created. Both architects and installers alike are convinced by the Chevron appearance and yet still with a fast installation. The graphic design is divided across 2 planks and is repeated several times lengthwise.

## OAK Vulcano Carving Chevron I [C021]

Oak wood with consistent colouring resulting from special heat treatment (without chemical additives). This treatment is intensifying the natural color play of the wood and leads to a variation in brown tones. Oak plank in 3-layer construction with small bevel on long side and approx. 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. For the main part the planks have healthy knots, isolated repairs up to 25 mm diameter and tension cracks up to max. 30 cm are possible.

## OAK Country Carving Check I [C013]

Oak plank in 3-layer construction with small bevel on long side and approx. 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. Cracks, knotholes and large knots are emphasized with black putty. Variations in colour and sapwood at the edges possible. Small open cracks and unsealed spots of a few millimetres are permitted.

Carving, an extraordinary symbiosis between the natural structure of wood and a variety on graphic design. The innovative Carving technology enables us to engrave classic, retro-modern and contemporary designs into naturally oiled wood surfaces. Directness, clarity and structure – these values again further developed and simplified, that is the Carving Check I. Its subtle charm ensures a highly recognisable value, but without intruding. Through its striking design Carving Check I is especially suited for boutiques and showrooms. It is also ideal for health and spa areas due to its non-slip surface. The graphic design runs along the floor plank and is repeated several times lengthwise.

## OAK Clear Carving Lipso I [C025]

Oak plank in 3-layer construction with small bevel on long side and approx. 4 mm top layer, with approx. 4 mm backing in the same wood and middle layer conifer. Tongue and groove on all sides for easy installation. The planks are free from knots and sapwood but have some curled spots. Small knots and slight stress are cracks possible.

Carving, an extraordinary symbiosis between the natural structure of wood and a variety on graphic design. The innovative Carving technology enables us to engrave classic, retro-modern and contemporary designs into naturally oiled wood surfaces. Carving Lipso I re-interprets a classic design from earlier times and with the help of precise processing technology, brings this onto the naturally oiled wood surface.

Only recognisable on a second glance, Carving Lipso I combines the advantages of high-quality wood flooring with the well-known lines of other wall materials. This floor is predestined for use in Gastronomy thanks to its resistant surface and its distinctive design. The graphic design is divided across 2 planks and is repeated several times lengthwise.

## Domino LARCH Vulcano [LADO]

Made from specially heat treated larch wood (without chemical additives), assembled in compact ready-to-install elements of end-grain blocks (40 x 40 mm). These are held together on a parquet net.

Isolated stress cracks and expansion gaps (e.g. due to climatic changes) are possible in the elements. These do not however influence the functionality of the floor (strength and stress bearing properties) in any way.

mafi Domino floors are not oiled on the production side, but must be oiled on site after installation. Therefore, Domino floors can only be ordered in unfinished form. The final appearance can then be achieved with the appropriate mafi wood flooring oils.

Extremely robust (suitable for ateliers and commercial properties!). Can also be used for raised floors.

### INSTALLATION:

Important! Installation should only be carried out by experts and the installation guidelines must be observed.

The maximum relative humidity of cement screed may not exceed 2 CM% (with underfloor heating 1.8 CM %). Additionally, the appropriate adhesive tensile strength (min. 1.2 N/mm<sup>2</sup> - highest stress class) must be noted.

# Wood SKIRTING flush to wall

Oak skirting board in two-layer construction with approx. 4 mm oak layer and approx. 6 mm backing made of softwood, cross-glued. In the case of the products Oak Vulcano Medium or Oak Vulcano, the material is given a uniform color by a heat treatment (without chemical additives). Sharp-edged on all sides without profile milling, according to the sketch. The slats mostly have healthy knots. Delivery in 1-3 lengths. Structure and color differences are in the nature of the wood!

Optional additional article: matching aluminium base profile

# Stairs 1/2

mafi stairs in OAK (see variants below) are manufactured in symmetrical 3-layer construction design from lamellas (Multi-layer), joiner multiplex sheet and lamellas (Multi-layer). Finished surface top and front. For all stairways, the visible sides can also be finished (closed) at a surcharge. Stairs matching the entire mafi portfolio may, in addition to the examples cited here, be produced on request. Non-visible sides with oversize. Use the stair form for ordering.

**Profile A:** 1200 x 300 x 40 mm (Standard dimension unless explicitly specified otherwise)

Special thicknesses possible > = 30 mm

**Profile B:** 1200 x 300 x 16 | 19 mm (Standard dimension unless explicitly specified otherwise)

Special thicknesses possible < 30 mm

**Profile D:** 1200 x 300 (step) / 180 (riser) x 40 mm

Pre-drilled and provided with tongue for assembly on site. Optionally without shadow groove. Separate tongue loose. Delivered by the piece (no bundling)

**Profile E:** 1200 x 300 x 16 | 19 mm

Edge mitred ready glued. Mitre 40 mm

**Profile F:** 1200 x 300 (step) / 180 (riser) x 16 | 19 mm

## Sika® Primer MR Fast A+B

COVERAGE: approx. 400 - 600 g/m<sup>2</sup> as moisture barrier after 2 applications.

150 g/m<sup>2</sup> as primer depending on substrate. Moisture Barrier: Component A+B 4.2 kg

AREA OF APPLICATION: 2-component, solvent free, low viscosity, primer for use under wood flooring products that require protection from sub-floor moisture. To help control osmotic moisture propagation in cementitious substrates with a moisture content up to 4 % CM method.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Sika Primer MR FAST 4,2 kg	BLZUPRFAST4	1 container = 4.2 kg	102.50

## Sika® Bond 54

COVERAGE: 1.000 - 1.200 g/m<sup>2</sup> depending on the condition of the substrate.

AREA OF APPLICATION: For optimal and durable bond of flooring planks, where high demands are made on the flooring and variations in climatic conditions are likely. No priming is required! Small irregularities in the surface can be compensated by a thicker application (adhesion is almost uniform from 1 - 5 mm). High impact and sound insulation. Even stress distribution – no compressive force on the glued surface. One-component adhesive, ready for use. For use on cement and anhydrite screed, tiles, chipboard and similar without priming, shrink-free moisture-accelerated curing.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Sika Bond 54 - elastic adhesive for parquet	SKUB0000T5400013	1 container = 13 kg	154.40

## Solvent-free Adhesive in cartridge Sika® Bond-T52

COVERAGE: approx. 1 m<sup>2</sup> per cartridge.

AREA OF APPLICATION: For slotted underlay mate.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Solvent-free adhesive in cartridge Sika Bond-T52	SKUB0000T5200600	20 pc. a 600 ml/carton	16.70
Hand cartridge gun for Sika Bond-T52	SKUB000KART00000	for 600 ml hose	161.80

## Underlay Mat with slots

COVERAGE: Of Sika® T52: 1.000 - 1.200 g/m<sup>2</sup> depending on the condition of the substrate.

AREA OF APPLICATION: for Sika® T52: Underlay mat with symmetrical slots for adhesion in strips, thickness 3 mm. Suitable for underfloor heating. Improves footfall sound insulation. Sold by roll 20 x 1 m = 20 m<sup>2</sup>

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Underlay Mat with slots	SKUBLAY002000103	rolls of 20000 x 1000 x 3 mm = 20 m <sup>2</sup>	196.40

# Plank glue / floating installation

## Glue D6085

COVERAGE: One bottle covers approx. 15 - 20 m². For tongue / groove gluing.

AREA OF APPLICATION: For all gluing to high standards and for gluing of joints of floor planks (tongue / groove gluing). Quality Class D3. STORAGE: Do not store below +5° C – SUSCEPTIBLE TO FROST.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Wakol D 6085 - Glue (in handy bottle)	WKUB000608500750	750 g / bottle	13.60

## Supplies for skirtings

### Sika® Bond Ultra Tack

AREA OF APPLICATION: Solvent-free, one-component, strong adhesion, elastic mounting adhesive with high initial tack.

METHOD OF APPLICATION:: cartridge syringe (approx. 20 ml per linear metre with 5 mm nozzle diameter). Skin building time approx. 20 minutes, hardening approx. 3mm per 24 hours

Operating temperature -40°C to 80°C

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Sika Bond Ultra Tack 290 ml	SKUB0000UT00290	290 ml	19.80

## Aluminium base profile for skirting profile F

Extruded aluminum profile for flush skirting boards, 60 x 15 x 2500 mm (approx. 2.36 x 0.59 x 98.42 inches). This skirting profile creates a 12 mm (0.47 inch) setback from your wall. It is a carrier profile for the later installation of wall-mounted baseboards.

APPLICATION: Use in solid brick construction, solid wood construction, timber frame construction as well as in double-walled drywall construction (for balloon construction and simple plasterboard, use mafi skirting profile F).

ASSEMBLY: Installation before plastering or in the course of drywall work, glue & screw assembly: claws on profile back for optimal adhesive adhesion, special grooves on the front for screw mounting.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Aluminium base profile	ALML0SI250006015	silver 2500x060x15mm	17.80

# Levelling compounds / undercoats

## Sika® Level-01 Primer

COVERAGE: approx. 35 - 70 g/m<sup>2</sup> mixed with water 1:2.

AREA OF APPLICATION: Sika® Level-01 Primer is a one-part, water-dispersed and solvent-free, acrylic-based solution used to prime and seal floor surfaces prior to the application of Sika Level-200 underlayment.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Sika Level-01 Primer	SKUBLEPR00501	1 container = 5 kg	111.20

## Sika® Level-400

[Leveler] Priming with Sika® Level-01 Primer.

COVERAGE: 1.660 g/m<sup>2</sup> for 1 mm thickness.

AREA OF APPLICATION: Sika® Level-400 is a One-component, durable and versatile cementitious under-layment for interior concrete and cementitious substrates. Typical Application thickness is 0.5 - 15 mm. MIXING RATIO: approx. 6.25 l water + 25 kg Sika® Level-400.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Sika Level-400 - Repair Compound	SKUB000040002501	1 container = 25 kg	72.90

## Sika® Patch-300

APPLICATION: for filling, leveling, repair and smoothing of imperfections or irregularities in screeds, concrete floors and walls, soffits, steps, platforms.

MIXING RATIO: 5.25 - 5.75 liters of water per 20 kg bag of Sika® Patch-300

CONSUMPTION: ~ 1.4 kg / m<sup>2</sup> / mm

LAYER THICKNESS: maximum 20 mm / min. 1 mm with chair roller load

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Sika Patch-300 - Repair Compound Underlay	SKUB000030002001	1 container = 20 kg	50.50

# Cleaning in the course of laying

## Cleaning Cloths RT 5960

AREA OF APPLICATION: Impregnated, highly absorbent cloths for cleaning hands and tools, surfaces of ready installed parquet and smooth covering, particularly when soiled with non-hardened PU adhesives, oil, grease and lacquer. Resealable after removal of cloth. [Dangerous good]

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
RT 5960 - Cleaning cloths	WKUB000596000150	1 container = 150 pcs.	58.00

# Expansion joints in the wooden floor

## Round cord seal

PRODUCT DESCRIPTION: To fill separating joints. Reduces the consumption of grout.

Recommended Price, excl. VAT / GST

## Alkoxy Joint Compound

[for filling separation joints]

PRODUCT DESCRIPTION: For edge joints and smaller separation joints. Cannot be sanded!

COLOUR: more colours on request

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / Can
Sealing material Alkoxy OAK	BLZUFM010310EI	310 ml cartridge	13.00
Sealing material Alkoxy TABACCO	BLZUFM010310TB	310 ml cartridge	13.00

## Installation tools

### Hammering Block

The hammering block has been specially designed for mafi planks.

The optimal fit onto the top layer and the tongue piece ensures force is applied evenly and at the same time prevents contact with any adhesive bed.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Push Bar Accessories with handle	BLZUSK002	1 piece	59.30

### Toothed Trowel B13

To achieve optimum floorboard adhesion, it is necessary to have enough contact points between the boards and glue.

Due to the higher adhesive lines, optimum adhesion is especially supported in long boards.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
One way - spreader	WKUB000SPACEW00	1 piece	6.20

CARE

Pricelist 2020

# Care products

## Wood floor oil

mafi wooden floor oil is for light re-oiling after installation. This gives the customer a perfect surface and also helps build resilience. The oil is ideally applied using a white pad and a single disc polishing machine. The floor must be re-polished afterwards with a sheep's wool pad. The oil is flammable - therefore all cloths/pads must be immersed in water after use and disposed of correctly outdoors.

## Wood floor oil natural

Coverage per litre: approx. 60 - 90 m<sup>2</sup> (depending on the absorbability of the wood) when treating previously oiled floors / approx. 8 - 12 m<sup>2</sup> for 2 applications on untreated wood

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Wood floor oil natural 1 l single container	HOPP00N0010001	1 l single container	33.30
Wood floor oil natural 1 l 6 pcs./box	HOPP00N0010006	1 l x 6 pc./carton	185.30

Wood floor oil grey 1 l 6 pcs./box	HOPP00G0010006	1 l x 6 pc./carton	202.50

## Wood floor soap

The mafi care products are cleaning and above all care in one! The mafi Wood floor soap has a very high fat content and therefore acts as a light oiling on the floor. The soap keeps the wood fibres smooth and flexible.

Dirt is bounded by the fat and can therefore be removed very easy.  
Regular maintenance with mafi Wood floor soap is vital for keeping the natural benefits of your mafi natural wood floor.

## Wood floor soap natural

Wood floor soap grey 2,5 l 4 pcs./box	HSPP00G0025004	2,5 l x 4 pc./carton	148.20

## Balsam oil floor care

mafi care balm oil is emulsified oil in water and is ideally applied with a sheep's wool mop. Using a sheep's wool pad the floor can then be polished to produce a beautiful shine.

The floor is completely dry after about four hours. In addition to the glossy effect, the care oil balm is also used to revitalise floors.

## Balsam oil floor care natural

Gives dull floors a beautiful lustre when polished in.

Coverage per litre: approx. 20 m<sup>2</sup> (depending on the absorbability of the wood).

Recommended Price, excl. VAT / GST

# Super Cleaner

For badly soiled areas on oiled wood surfaces. ph value = 9,5 – 9,7

COVERAGE: approx. 20 – 50 m<sup>2</sup> (depending on soiling)

## INSTRUCION FOR USE

1. Mix approx. ½ litre Super Cleaner with 10 litre warm water.
2. Apply we using mop (or similar), leave to soak in for a short time and then treat the soiled surface using green sanding fleece (by hand or machine). Do not use a green pad for Vulcano floors as scratch marks can become visible. IMPORTANT: Always treat only small areas, max. 10 – 15 m<sup>2</sup>, at a time. Remove the solution containing the dirt immediately with clear water (always work with two buckets!). Repeat this procedure if necessary.
3. Wipe again with clear water; no Super Cleaner solution should be left on the wood surface.
4. After the wood surface has been allowed to dry out completely, re-oil must be carried out using mafi Wood Floor Oil or mafi Prof Oil.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Super Cleaner 1 l single container	SRPP00N0010001	1 l single container	17.90
Super Cleaner 1 l 6 pcs./box	SRPP00N0010006	1 l 6 pc./carton	97.60

# Anti Grey Deep Cleaner

The mafi Anti Grey Deep Cleaner serves for the removal of different stains such as pet urine, oxidation traces, edges from flowerpots and similar, dark areas, and as additional aid for removal of old red wine stains and joint compound remains.

The affected area is first moistened with water. Then the Anti Grey Deep Cleaner is applied with a small paint brush, allowed to soak for a short time and then washed off with water in combination with mafi Wood Floor Soap. The process can be repeated several times.

ATTENTION: The Anti Grey Deep Cleaner bleaches the wood – therefore the soaking time should not be too long and all traces must be removed afterwards. The result is only visible once completely dry. A decision on a re-application should only be made on the basis of the visible wood colour thereafter.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Anti Grey Deep Cleaner	FEPP00N0250001	250ml bottle	12.40

# Spot Stop Grease Stain Remover

The mafi Spot Stop quickly and easily removes fat stains from mafi Natural Wood Floors. [Dangerous good]

## Instructions:

1. Warm the fat stain briefly with a hairdryer – this re-liquifies the fat.
2. Spray the stain from about 20 cm away.
3. Allow to work for three minutes.
4. Then, wash the area with warm water and the relevant mafi wood floor soap (do not scrub!)
5. Once the area is dry, check to see if the stain has disappeared. Repeat the process if necessary.

Recommended Price, excl. VAT / GST

Product	Article Number	Dimension	EUR / pcs.
Spot Stop Grease Stain Remover- spray can	SSPP00N0150001	150 ml	16.10

## Production

**Where are mafi natural wood floors produced?**

mafi natural wood floors are manufactured exclusively in Austria. In two production facilities, within 12 km from each other, the entire production chain, from raw material to the finished planks is kept in-house. Any external service providers such as sawmills come from the local region. Short distances, close co-operation and transparency are a guarantee of product quality.

**How are the mafi planks constructed?**

The majority of mafi planks are made of balanced, symmetrical 3-layer construction. Thus, the top and also the back layers are made with the same wood and same thermal treatment. This results in a balanced counter-move which makes the planks significantly stiffer and are therefore perfectly suitable for installation on underfloor heating. The middle layer is cross-glued and consists of Austrian Spruce.

The panel parquet is a symmetrical 3-layer construction with circumferential chamfer and all-round tongue and groove for endless laying. Top layer, approx. 4 mm (hardwood), consisting of quality select wood. Middle layer consisting of a 3-layer panel; white glue (PVAc) is used to stick it to the top and back layers. Back layer, approx. 4 mm (hardwood), consisting of the same wood as the top layer.

The thin plank is produced in a multi-layer construction. The top-layer is 3 mm thick whereas the back-layer is approx. 1.8 mm thick. Both layers are made of the same wood with the same thermo treatment. For the middle-layer, a softwood is used crossways and the top-layer as well as the back-layer are glued with White Glue (PVAc).

Floors of the mafi Piccolino collection have a compact multi-layer construction. The top layer consists of approx. 4 mm or 5 mm (hardwood or softwood) selected quality wood. The middle layer consists of cross-glued softwood, just as the back layer. The gluing of the running layer and back layer is done using white glue (PVAc).

Floors of the mafi Domino collection are made from massive grain-block wood cubes, which are delivered on a bonded floor net in the size 400 x 200 mm.

## Manufacturing

**Can I customise a mafi natural wood floor?**

mafi produces to order and thus enables individual customisations of the products. A variant described already in the price list is the free choice of the putty filler colour. Products that are marked with CC (custom colour) can be made in an appropriate RAL colour. Also the Carving collection offers potential for individual designs. Sample production and quantities are to be discussed prior to production. Special thicknesses, special surface treatments or further adjustments are available on request.

## Product Data

**Where can I find information about technical aspects of the wood floor?**

Information regarding underfloor heating suitability, application areas, emission classes, fire behaviour and weight can be found in the footer of the corresponding price list sheet. You can download the product data sheet for each individual floor on the product detail page on mafi.com. Information on accessories and care products can be found in the information of the product description.

## Surface

**How do the floors get their colours?**

mafi completely dispenses with lacquer or other film-forming surface treatments and relies purely on natural oils as well as a chemical-free thermo treatment. The colours of the planks are always based on the colour play of nature. Optionally, the wood is also thermally dried which results in a colour change from light to dark. The choice of the oil colour completes the finishing. In short, the wood + thermo treatment (yes/no/intensity) + oil = colour tone of the plank.

**Why are there differences in the same surfaces on different products?**

The natural growth of the tree, its character, is unique and individual. The grain, size of the pores, or the knot appearance decides in nuances the final appearance of the planks. Thus, an Oak Character and an Oak Country, despite having the same surface treatment can vary slightly. These nature-related variations are what make natural wood floors so unique.

**Why are not all product surfaces shown in the colour collection overview?**

In the colour overview of each collection, we're primarily focussed on a quick overview of the various colour versions of the products. Possible machining treatments of the surface such as „heavily brushed“ have almost no influence on the resulting colour. Therefore, an individual wood pattern sample is avoided in these cases.

## Order

**What information does one need for a mafi offer?**

For an offer or an order, we need the detailed product description. For floors, this includes the product, the selected surface as well as the corresponding length, width and thickness. Alternatively, the full product code can be used. To do this, we need the quantity, the required delivery period, as well as a shipping address if that differs from the invoice address.

**How can I order?**

Orders must be in writing. We accept orders by email or letter. In addition, mafi partners can order around the clock on mafi.com. Your responsible internal and external sales contact is happy to assist you.

**How does a complete article code look?**

A complete article code includes information about the desired product, the surface as well as the dimensions and if available a profile (e.g. for skirting boards). The box system on each price list sheet gives a clue as to what information is required.

**What do the coloured dots next to the products mean?**

The system provides information on the production time of the products. The Green Dot means 4 days and the Yellow Dot means 10 days for production. The Red Dot must be requested. However, this does not necessarily mean a long production time. Orders of a product over 300 m<sup>2</sup> are automatically considered a Red Dot.

**Do I have to manually calculate the possible surcharges?**

The mafi online ordering system for partners does this task for you. By switching between consulting and ordering mode, you also see your margin - also in relation to an offer that is generated in the system.

**Where can I find information about packing sizes and weight?**

Packages with floors of 16 mm thickness contain six planks; of 19 mm and 21 mm thickness contain four planks. Thin planks and floors of the Piccolino collection are packed with nine planks per package. Domino floors with a thickness of 9 mm contain 20 pieces and with a thickness of 19 mm contain 10 pieces per package. For the weight per m<sup>2</sup>, please refer to the respective price sheet. Information on care and accessories can also be found on the corresponding price sheets.

## Samples

**How can I order samples?**

Your responsible internal sales contact gladly accepts samples orders. If you don't have regular contact with mafi, your external sales contact is available. Otherwise, you can reach us at +43 7746 2711 or muster@mafi.com. For mafi Sales Partners we additionally offer an online sample ordering around the clock.

**How do I get personalised samples?**

For certified mafi Sales Partners we offer personalised samples which are marked with the partner's logo and the contact details. This service is offered purely via our online order form. Orders by email are processed as before with regular samples.

**What advice do I need to consider with samples?**

Samples are single sections of planks and represent only a portion of a whole floor. For solid consultation, the mafi catalogue and our website should be used additionally. Samples should be checked regularly and if necessary maintained or re-oiled.

## POS

**What options does mafi offer for showrooms?**

mafi provides partners a planning of full showroom corporate identity. The options range from interchangeable modules for sample boards, starter sets such as the Pioneer Sample Stand and onto coloured frames for wall mounting of sample boards. The available options can be found in the mafi POS folder.

**What sales support products does mafi offer?**

Aside from the current catalogue and website, new print and digital offerings are continuously designed that accompany the consultation process. The mafi POS folder provides information on all marketing materials.

## Website mafi.com

**How do I get further information outside of the pricelist?**

The best and in-depth method is a consultation from a mafi Partner or external Sales contact in your region. Our website is ideal for advance information and research. The PDF version of the pricelist offers, via the colour overview, a direct link to each relevant product on the website.

## Service

**What is the mafi passport?**

The mafi passport is handed over with the delivery note and is provided for products from the current pricelist. For special productions, no mafi passport is provided. The passport serves as care instructions for the end-customer and additionally contains a registration code which the end-customer can use to register their floor on mafi.com. A small Welcome Package will be delivered as a 'Thank You'. For Partners, there is a tear-off card on the back of the passport which can be used as confirmation of handover of the care instructions.

**How do I get pictures from mafi?**

The wood sample images shown in the pricelist are available for our Partners on our website, as well as the reference images. Using the "Planning Table" tool on mafi.com you can download the images in high quality resolution. Image rights must however be approved for use and your access to the Planning Table must be activated by your mafi external sales contact.

## Installation and Care

**How are mafi floors installed?**

An overview of the most important aspects for installation can be found at the start of this pricelist. For more detailed information, please refer to the mafi Installation Instructions and our website mafi.com.

**How must mafi floors be cared for?**

An initial description can be found at the start of this pricelist. For more detailed information, please refer to the mafi Care Instructions and our website mafi.com.

## Contact

**How do I find my mafi contact person?**

At mafi there is a duo consisting of both an external and an internal sales contact available for you. If not already established, we will connect you to your relevant contact person. You can reach us on +43 7746 2711 or office@mafi.com.

**How can I become a Sales Partner?**

We are always interested in expanding or improving our existing Sales Partner Network. Your responsible external sales contact will be happy to discuss possible co-operations, chances and conditions for collaboration. If you don't already have a contact, we will gladly help. You can reach us on +43 7746 2711 or office@mafi.com.

# GENERAL TERMS AND CONDITIONS

Provider: mafi Naturholzboden GmbH (referred to in the following as "Provider") · Company registered by the Salzburg Commercial Court with registration number FN 116654a  
Adress: Utzweihsstraße 21-25, 5212 Schneeeggattern · Telephone: +43 . [0]7746 . 2711 · Fax: +43 . [0]7746 . 3747 · E-Mail: office@mafi.com · www.mafi.com · VAT-Nr.: ATU21622402

## CHAMBER/TRADE ASSOCIATION

We inform that the currently valid version of the General Terms and Conditions of mafi Naturholzboden GmbH is also available on the corporate homepage. The given General Terms and Conditions can also be printed out using general browser functions (Menu "File" – Command "Print") or copied on any storage device (Menu – "File" – Command "Save") at any time. Every Purchaser is expressively invited to inspect and copy these General Terms and Conditions.

## PREAMBLE

The Provider, mafi Naturholzboden GmbH, Company ID Number 21622402, Utzweihsstrasse 21-25, 5212 Schneeeggattern, sells the goods offered under the conditions set out below.

## 1. SCOPE OF APPLICATION

All deliveries, services and offers of the Company are exclusively provided according to these General Terms and Conditions. The Provider does not acknowledge any other Customer provisions being contradictory to or differing from these General Terms and Conditions – unless otherwise agreed by the former.

The performance of contractual obligations on the part of the Provider shall not be deemed as binding approval of the provisions differing from the present General Terms and Conditions. Furthermore they shall also apply as general agreement to further business transactions between the parties.

## 2. CONCLUSION OF THE CONTRACT

Offers to join in contract require an order confirmation. The Customer shall be bound by this offer for a reasonable period but in any case not less than 4 weeks from receipt of the offer. In case there is no order confirmation by this time, the Customer shall be entitled to withdraw from the order after granting a period of grace for order confirmation.

## 3. RIGHT OF WITHDRAWAL OF THE CONSUMER

3.1. If the Customer is a Consumer as defined by the Austrian Consumer Protection Law (KSchG), he/she can withdraw from a distance sales contract within 7 working days (§ 5e KSchG) -as long as no special provisions apply.

3.2. The withdrawal period is 7 working days, whereby Saturday is not deemed a working day. In the case of contracts governing deliveries of goods, this period begins from the day of receipt by the Consumer (Customer).

He/She shall have to send a notice of withdrawal within this period of time.

3.3. The right of withdrawal does not apply to contracts concerning the following goods: (a) goods manufactured according to Customer requirements, (b) goods clearly tailored to meet personal needs, (c) goods unsuited for return due to their nature, and (d) goods easily perishable or past their expiration date (§ 5f Par 1 Z 3 KSchG).

3.4. If the Consumer (Customer) withdraws from the contract, Provider and Consumer must concurrently do the following:

- The Provider must refund the payment as well as reimburse all incidental and beneficial expenses to the Consumer (Customer)
- The Consumer (Customer) must return the goods received and pay to the Provider appropriate compensation for their use as well as an indemnification for the general reduction in value of the goods.

The Consumer shall bear direct return shipping costs.

## 4. PRODUCT RANGE

All the information and technical specifications of the goods are based on production data sheets and price-lists and are binding for the offers of mafi Naturholzboden Online Shop. This does not include changes in design and technology -which improve the functioning of an item -errors in specifications, illustrations or prices.

## 5. PRICES

5.1. If nothing otherwise is expressly agreed, all given prices are exclusive of value-added tax. In the event of changes in labour costs resulting from collective bargaining agreements within the sector or corporate work agreements as well as in case of changes in other cost centres relevant for the calculation or necessary for the service provision – i.e. costs of materials, energy, transport, subcontracted works, financing, etc. – the Provider has the right to increase or decrease the price accordingly. Point 5 Par 1 of these General Terms and Conditions shall not apply to Consumer transactions.

5.2. All prices shall be deemed in the stated currency and refer to packaged goods, supplied ex-warehouse. Transport and packaging costs are subject to change.

## 6. TERMS OF PAYMENT

6.1. Payments shall be made after invoicing in accordance with the terms of payment set out by the Purchaser. Investment partners without a pass-word will be only supplied in terms of COD. The Purchaser can offset counterclaims against mafi Naturholzboden GmbH only through acknowledged and legally established claims. The same applies to the right of retention.

6.2. In case of default of payment on the part of the Customer, the Provider is entitled to choose either compensation for the damages actually incurred or to demand default interests at the applicable base interest rate. Default interests for the Consumer amount to 4% p.a. and for entrepreneurs 9.2% p.a. above the applicable base interest rate.

6.3. In case of default of payment, the Provider is entitled to charge compound interest as of the day the goods were received.

6.4. . If not otherwise agreed, mafi is entitled to require a first instalment of 50% of the actual price within 8 days from the receipt of the confirmation order. Deadlines for deliveries and services start running from the date of payment receipt.

Invoices shall be due for payment within 8 days from the date of the invoice.

In the event that mafi is informed that the Customer is experiencing circumstances which could endanger the recoverability of the respective liability, i.e., pressing creditors, impounding procedures of third parties, suspension of payments, insolvency proceedings, incorrect information about his/her creditworthiness, etc., mafi is entitled to require advance payment before any delivery/service regardless of the conclusion of the contract. If the advance payment is not submitted within the specified time limit, mafi is entitled to withdraw from the contract with immediate effect and to claim.

## 7. REMINDER FEES AND COLLECTION CHARGES

In case of default of payment, the Customer is obliged to reimburse the Provider the occurred reminder fees and collection charges as far as they are inevitable to assert legal rights. At all events, companies are charged a lump sum of 40 € for operating costs in accordance with section § 458 of the Austrian Enterprise Code (UGB). The assertion of further rights remains unaffected hereby.

## 8. DELIVERY, TRANSPORT, DEFAULT OF ACCEPTANCE

8.1. Selling prices do not include costs for delivery, assembly or installation. If required, however, these services can be performed or organized by the Provider against separate payment. In this case transport and delivery shall be invoiced at cost plus a reasonable surcharge for overhead expenses which shall, however, be no less than the normal freight and carriage charges for the chosen means of transport, or those applying on the day of delivery. Assembly work will be charged at an hourly rate whereby the usual labour/hour rate for the appropriate sector applies.

8.2. In the event that the Customer does not accept the goods (default of acceptance) the Provider shall, after failure to meet the period of grace, have the right either to store the goods on own premises and charge a storage fee of 0.1% of the gross invoice per calendar day or store the goods at cost and risk of the Customer in an authorized external storage business. At the same time the Provider shall be entitled to insist either on the performance of the contract or, after having set a reasonable period of grace of 2 weeks, to rescind the contract and use the goods elsewhere.

8.3. Offers have to be deemed valid for B2B transaction in the following countries: AT, AU, BE, CH, CZ, DE, ES, GB, HK, ID, IN, IT, JP, KR, LU, PL, TR, UA, US as well as for B2C transaction in AT, DE, IT, BE, FR, GR, GB, IR, LU, NL, PL, PT, ES, CZ and CY. Products can only be delivered to an invoice address in one of the above mentioned countries. Other countries can place an order per e-mail, which is forwarded to a partner company. In this case the partner company transmits the confirmation of order and the contract with the Customer is concluded directly between the partner company and the Customer.

## 9. TERMS OF DELIVERY

9.1. As long as goods are in stock, the products will be immediately supplied to the address indicated by the Customer. At all events, the written confirmation of order shall include an expected delivery date.

9.2. Delivery of goods is made (from the loading ramp) at cost and risk of the Customer including when partial deliveries are made.

9.3. The Provider is entitled to extend the scheduled deadline by up to 1 week. After the expiry of this period, the Customer shall have the right to withdraw from the contract after setting an appropriate period of grace.

9.4. In case of default in delivery on the part of the Provider for reasons which are exclusively the responsibility of the upstream supplier, the Provider shall not be liable for any damages caused by delay.

9.5. Claims in case of transport damage shall only be settled in case of externally visible damage of the goods ordered and only against a confirmation of the carrier. Large parcels and deliveries over 30 kg are shipped by forwarding agents.

9.6. Unless the business transaction was completed with a Consumer, slight changes or other changes to service and delivery obligations, which are reasonable for the Customer, shall be considered as approved beforehand. This applies in particular to production-related deviations of goods (i.e., measure, colours, structure, etc.).

## 10. COMPENSATION FOR DAMAGES

10.1. All claims for compensation shall be excluded in case of minor negligence. This shall not apply to personal injuries or, in case of a transaction with a Consumer, to damages to the goods taken over for further processing.

10.2. Unless the transaction was completed with a Consumer, the minor or gross negligence has to be proven by the injured party. Insofar it is not a Consumer transaction the period of limitation for damage claims is 3 years from risk transfer. The provisions regarding the compensation for damages as stated in these General Terms and Conditions, or otherwise agreed on, shall also be applied if the claim for damages is asserted in addition to or instead of a warranty claim. If the transaction does not involve a Consumer, the assertion of claims for damages related to any form of delay (in case of order cancellation, non-performance loss, default delivery, damages due to delay) shall be expressively excluded.

## 11. RETENTION OF TITLE

All goods are delivered by the Provider with retention of title remaining the property of the former up to full payment. In the assertion of the retention title, a withdrawal from the contract is involved only if expressively declared. In case of goods being returned, the Provider is entitled to charge any transportation and handling expenses. In the event that third parties lay any claims on the goods subject to retention of title – in particular in case of garnishment -the Customer shall point out that the goods seized are property of the Provider and shall inform the latter immediately. If the Customer is a Consumer or not a Company whose regular business activities include the trading of the goods purchased from the Provider, the Customer is not authorized to use the goods under retention of title, in particular selling, pawning, giving away, or loaning of the goods is not allowed. The Customer shall carry the whole risk for the goods under reservation of title, in particular for destruction, loss or deterioration.

## 12. ASSIGNMENTS

12.1. In the event of goods delivered with retention of title, the Customer shall immediately assign his/her claims against third parties to the Provider, as long as these claims arise from the sale or processing of the goods delivered. This applies until full and final settlement of all claims against the Provider. The Customer is obliged to name his/her own final buyers on request and to inform the latter about the assignments. The assignments must be entered in the books, in particular in the open outstanding postings, and be clear to the final buyer on every delivery note, invoice, etc. If the Customer falls with his/her payment into arrears against the Provider, his/her sales revenues shall be kept separately and the Customer shall hold them only on the behalf of the Provider. Claims against any insurer shall be assigned to the Provider to the extent and limits defined by § 15 of the Austrian Insurance Contract Law (Versicherungsvetragsgesetz).

12.2. Claims against the Provider cannot be assigned to others if not expressly agreed.

## 13. RIGHT OF WITHDRAWAL OF THE PROVIDER/UNJUSTIFIED WITHDRAWAL OF THE CUSTOMER

13.1. In case of default of acceptance (see point 8.) or other major reasons, such as default payment on the part of the Customer, the Provider shall be entitled to rescind the contract, insofar that it has not yet been fully fulfilled by both contracting parties. In the event that the withdrawal of the Provider is attributable to shortcomings of the Customer, the Provider is entitled to claim compensation for damages of 25 % of the gross invoice amount or compensation for the actually incurred damages. In case of default payment on the part of the Customer, the Provider is discharged from further contractual and delivery obligations and is entitled to withhold outstanding deliveries or ongoing performances and to claim advance payment or deposit. After a reasonable period of grace, the Provider is entitled to withdraw from the contract.

13.2. If the Customer withdraws from the contract without being entitled to do so or if he/she demands its cancellation, the Provider shall be entitled

either to insist on the fulfillment of the contract or to approve the rescission. In the latter case, the Customer is obliged, at the discretion of the Provider, to pay compensation for damages of 25% of the gross invoice amount or compensation for the damages actually incurred.

## 14. RETURN POLICY

The Purchaser has the right to send the goods back to the Provider within 14 days without giving any reasons. Return policy shall apply provided that the item is returned undamaged, complete, in working order and with its undamaged original packaging (no individual labelling with customer number). The revocation right of return begins with the receipt of the goods. The Customer shall bear the costs of the return shipment. If the goods are properly returned within this period of time, the Customer is entitled to receive a credit note (a refund in case of COD) or a replacement.

## 15. WARRANTY AND LIABILITY

15.1. If the transaction was not completed with a Consumer, the Customer shall be immediately obliged to control the goods delivered with regard to quality and quantities and to notify the Provider of any damages to the packaging or contents, or reduced quantities after delivery (within 12 hours). If the Customer fails to do so, all warranty claims will become void. The Customer can not lay any claims in case of minor or production-related changes in construction, form, wood colour and/or dimensions.

15.2. If the transaction was not completed with a Consumer, the Customer shall be obliged to examine the functionality and possible defects of the goods delivered. Any defects must be notified to the Provider within 5 working days from delivery day or detection of the defect. If the Customer fails to issue the notice of defects on time, all warranty claims as well as any compensation for defects will become void.

15.3. All products offered shall be replaced or repaired free of charge provided that the Customer notified the Provider of any defects in writing and in due time. If the repair fails, if it is not possible to provide a replacement, or the replacement is delayed for a longer period than considered a reasonable time (at least 14 days) for reasons the Provider is accountable for, the Customer is entitled to demand a reduction on purchase price or a modification of the contract. Warranty shall not apply if the Customer makes any changes or repairs on the good without the prior written approval of the Provider.

The Provider disclaims any liability for monetary losses or damages on the part of the Customer. This applies to direct or indirect damages, which may result as a consequence of improper use or natural wear and tear. Other damages which did not incur to the delivered item itself are also excluded. If the Provider shall be liable for any monetary losses or damages discovered on the item, the liability shall be limited to the purchase price paid by the Customer for the item. Liabilities for any other consequences shall be excluded unless the Provider acts with intent or gross negligence.

## 16. DATA PROTECTION, CHANGE OF ADDRESS AND COPYRIGHT

16.1. The Customer agrees that the personal data disclosed in the sales agreement shall be automatically saved and processed for the fulfillment of the contract.

16.2. The Customer shall be obliged to notify the Provider of any changes in his/her address and/or company address as long as the contractual obligations of the legal transaction have not been mutually fulfilled. In the event that this notification is not given, all correspondence shall be deemed delivered even if sent to the last notified address.

16.3. Drawings, sketches and other technical documents as well as samples, catalogues, brochures, diagrams and similar material shall remain the intellectual property of the Provider; the Customer has no licenses or intellectual property rights of any kind.

## 17. RIGHT OF RETENTION

Unless the business transaction was completed with a Consumer, the Customer shall not have the right to retain the total amount of the invoice, rather only a reasonable part of the gross invoice in case of a justified complaint. This does not apply in the case of cancellation of orders.

## 18. PLACE OF PERFORMANCE, CONTRACT LANGUAGE, APPLICABLE LAW, JURISDICTION

18.1. Place of performance is the registered office of the Provider.

18.2. Language of contract shall be German.

18.3. The contracting parties agree upon the validity of Austrian domestic jurisdiction. Unless the business transaction was completed with a Consumer, all disputes arising from this contract shall belong to the sole jurisdiction of the competent Court according to the location of the Provider.

18.4. With the exception of reference norms referring to international private law and the UN convention of contracts for the international sale of goods, Austrian law shall be applied to this contract.

## 19. PARTIAL INVALIDITY

If any provision of this contract shall be held entirely or partly unenforceable, invalid and/or void or become so during the validity of this contract, the other provisions of this contract shall not be affected. In this case the contracting parties shall be obliged to replace the unenforceable, invalid and/or void provision (or becoming unenforceable, invalid and/or void) with another enforceable and valid provision, which has the same economic purposes as the previous one as far as it is permitted by law.

## 20. FINAL PROVISIONS

20.1. All binding declarations related to this contract shall be notified in writing to the contracting party and sent to his/her most recent address. Any declaration sent to the latest address shall be deemed received by the contracting party.

20.2. The designation of the various titles of chapters of this contract is for the sole purpose of clarity and shall not be used for the interpretation of this contract.

20.3. The assignments of the rights and obligations deriving from these General Terms and Conditions shall be expressively agreed upon in writing by the contracting party.

20.4. If any provision of these General Terms and Conditions shall be or become invalid, the legal validity of the other provisions shall remain unaffected. The contracting parties shall be obliged to replace the invalid provision with another one, which is as close as possible to the ineffective one. The Provider reserves the right to modify these General Terms and Conditions at any time.

## 21. AUSTRIAN TELECOMMUNICATION LAW

In compliance with § 107 of the Austrian Telecommunication Law (TKG), the Customer hereby agrees to receive messages, for advertising purposes, from the Provider or from a Company awarded by the Provider. The Customer is entitled to revoke his/her consent at any time.

The currently valid version of the General Terms and Conditions are available on: <https://mafi.com/en/shared/en-general-terms-and-conditions>
